PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 5+ years of development experience across web applications, business platforms, dashboards, CMS tools, client portals, and backend-heavy systems. Strong in Laravel, React, TypeScript, JavaScript, MySQL, APIs, admin systems, payment integrations, and premium frontend execution. Known for turning business requirements into usable systems, improving internal workflows, and building digital products that support operations, reporting, and customer-facing experiences.

CORE SKILLS

Backend	Laravel, PHP, Node.js, REST APIs, authentication, CMS architecture, admin panels
Frontend	React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Blade, responsive UI Database
	MySQL, PostgreSQL, schema planning, data-driven dashboards, Google Sheets workflows
Integrations	Paystack, Flutterwave, Stripe, Google Maps, SMTP/Hostinger, Firebase, Socket.io
Tools	Git, GitHub, Postman, VS Code, PyCharm, cPanel, hosting/deployment workflows
Business Systems	Client portals, KYC forms, dashboards, media/content workflows, reporting, documentation

PROFESSIONAL EXPERIENCE

Rockmould Limited - IT Analyst / Web Developer

Real estate and construction company | Lagos, Nigeria

- Built and refined Rockmould Limited's official website across frontend, backend, CMS/admin workflows, client portal structure, and content/media upload processes.
- Improved the company website's premium positioning by benchmarking against luxury digital experiences and applying stronger visual structure, content hierarchy, and user journey improvements.
- Supported deployment readiness by completing finishing touches, organizing website media, reviewing frontend/backend flows, and preparing the platform for hosting approval.
- Created and supported internal digital tools, including a client KYC Google Form and project sales dashboard workflows using Google Sheets.
- Helped translate business, executive, and operational requirements into practical digital systems, reports, dashboards, and documentation.
- Produced weekly reports, self-appraisal content, internal documentation, PDF/DOCX deliverables, and structured updates for management visibility.

Freelance Full Stack Developer - Web Applications, Dashboards & Business Systems

2018 - Present | Remote and client-based work

- Delivered and supported websites, dashboards, CMS tools, backend systems, and business platforms for clients and internal teams.
- Built solutions across real estate, non-profit, school management, event, operations, and service marketplace use cases.
- Planned and developed systems with admin control, authentication, database workflows, email notifications, payment tracking, content management, and reporting features.
- Worked across modern frontend and backend stacks, with focus on usable interfaces, stable backend logic, and maintainable project structure.

Nigerian Ports Authority - Internship / NYSC Technical Support & Development

- Worked on internal digital systems and database-driven workflows for staff and operational use cases.
- Gained practical experience supporting organizational tools, documentation, and structured technical processes within a large public-sector environment.

SELECTED PROJECTS

Rockmould Limited Luxury Real Estate & Construction Platform

- Developed a premium company website with CMS/admin capabilities, client portal planning, backend structure, media content workflows, and luxury brand presentation.

UrbanHandy - Uber-like Handyman and Errand Service Platform

- Building a mobile-connected service marketplace using Flutter, Laravel, MySQL, Google Maps, payment gateways, and real-time communication through Socket.io or Firebase.

School Management System Planning and Refactor

- Designed workflow direction for Nigerian school admissions, class structure from Creche to SS3, admin/CMS control, fee setup, parent/guardian payments, and email confirmations.

Aimer Foundation Platform

- Worked on a non-profit platform direction with CMS structure, donation/payment capabilities, responsive pages, and dynamic backend features.

#AJBABSFOREVER26 Wedding Website

- Planned a responsive event landing page with guest wishes submission, dynamic display, admin moderation, and elegant visual direction.

KEY ACHIEVEMENTS AND IMPACT

- Moved company website work from design/build phase toward deployment readiness by completing frontend, backend, CMS, and media content tasks.
- Improved business visibility through dashboard support, structured reports, and operational documentation.
- Reduced manual data collection friction by creating a client KYC Google Form for structured client information capture.
- Strengthened executive-facing communication by preparing professional reports, self-appraisal material, workplans, and project documentation.
- Built strong cross-functional value by combining technical implementation with business understanding, design sense, and workflow thinking.

TECHNICAL STACK

Laravel | PHP | Node.js | React | TypeScript | JavaScript | Blade | Tailwind CSS | HTML | CSS | MySQL | PostgreSQL | Python | Flutter | Firebase | Socket.io | Paystack | Flutterwave | Stripe | Google Maps | Git | GitHub | Postman | VS Code | PyCharm | Google Sheets | cPanel

EDUCATION

Education: [Auchi polytechnic ,HND, 2023]

PROFESSIONAL VALUE

I help businesses turn ideas, internal workflows, and customer-facing needs into functional digital systems. My strongest value is combining backend logic, frontend execution, business reporting, and clear communication to deliver systems that people can use, manage, and improve.
